

Blogs, Journals, and Wikis in Blackboard 9.1

	Wiki	Blog	Journal	Discussion Board
Common Uses:	A collaborative space where all students can view, contribute and edit content.	A shared online diary for use in class.	Personal writing space for self-reflection and private communication with the instructor.	Online discussions that are organized hierarchically with forums, threads and replies.
Potential Uses	Grant writing, creative writing, group research projects, student-filled study guide for test (Instructor provides the outline and students collaboratively fill it in)	"What we did / will do in class" saves instructor having to answer individual inquiries, online discussions about related topics, a place to hand in evidence of class participation, "Muddiest Points" of what was covered in class.	Reflect on personal growth throughout semester, record things learned on field trip, express oneself, document clinical experiences, and "Muddiest Points" that are private.	Since we've had the discussion board in Blackboard since the beginning, this is a tool you might be comfortable with for online discussions.
Notes	When a student is updating a wiki page, the rest of the students are locked out of it until it is released. This is the only Bb tool that allows multiple students to collaborate within the same text entry area. The other two tools store student entries separately under	Important Setting: Individual to all students = Entries and grades are separate to each student. To view entry, you click on the student's name. Course = All student entries are listed together when entering the blog, and all students get that same	If you set Permit course users to view journal, the journal will not be private, making it more like a blog with commenting turned off. Cool idea from UND: With "permit course users" turned off, ask students to post individual, original responses on a topic.	Discussion boards are easily collapsed, expanded and searched. Users can Subscribe to a forum or thread and receive an email update every time someone adds to it. Printing is managed with a single click. Students can rate posts. Can be copied, like in

the students' names, but the wiki can be organized by research topic, work group, etc.

grade.
Entries can be saved as drafts and posted later. A green "!" designates ungraded entries. Blogs are less structured than the Discussion Board, and they're chronological. The format is more open and conversational in style.

Then make them public for review by everyone, preventing students from repeating remarks in early entries!
Muddiest / Clearest Point:
Use last 5 minutes of class for summarizing and reflecting in the blog about the day's content.
Entries are listed by student name, and new entries that have not been viewed by the instructor have a thumbtack icon by them.

the case of separate instances for groups. Feedback from students favors the other 3 tools over discussion boards, possibly because of the "look/feel".
